Build Your Own Profitable Autopilot Online Empire Each and Every Month:
www.FreeMonthlyWebsites2.com

Hi, John Thornhill here.

The main purpose of this report is to explain to you that Multiple Streams of Income really are the Key to Online Success. I will also explain just what you need to do, in order to get your own 'multiple streams' flowing in.

I'm sure you have heard the term 'never store all your eggs in one basket' before.

Well if you operate online this term rings so true. There have been various 'slaps' and rule changes over the years that have ran various online businesses into the ground overnight. Take the Google 'slap' that resulted in advertisers' revenue costing 100 times more overnight. Or the eBay digital delivery ban that put 1000's of info product sellers out of business in a matter of days. While it's easy to become complacent when the big bucks are rolling in unless you are generating multiple streams of income you are destined to fail from the beginning.

So let me warn you right now. Unless you offer many different products and services and have many websites online one day you may wake up to a business that has gone bust. Remember that online things move so fast and what was the latest craze one week could be out of fashion a week later.

So the key to generating sustainable wealth on the Internet is to create as many different websites as possible offering a whole range of products and services, but more importantly you have to keep building your business on a daily basis.

This is something I have been doing myself since 1999, in fact here's a screenshot of **just one** of my hosting accounts, look at how many websites I own:

The screenshot shows the 1&1 Control Panel interface. At the top, there is a blue header with the 1&1 logo and the text 'CONTROL PANEL'. Below the header are three navigation tabs: 'ACCOUNT', 'PACKAGES', and 'ADMINISTRATION'. The 'ACCOUNT' tab is selected. Below the navigation, a welcome message reads: 'Hello Philip Thornhill. Welcome to the 1&1 Control Panel.' Below this is a 'MESSAGE BOARD - Important message waiting' section. It contains a notification: 'You have 42 new messages.' followed by a list of message subjects: 'Your 1&1 Domain: Renewal Notification', 'Your 1&1 Domain: Renewal Notification', 'Your 1&1 Domain: Renewal Notification', 'Your 1&1 Domain: Renewal Notification', and 'Domain transfer request'. Below the message board is a 'Package Overview' table.

No	Package	Type
1	Professional 27 domains	Web hosting
2	Professional 84 domains	Web hosting
3	Business Managed Server I 50 domains	Server
4	1&1 Dedicated Server DC L Website 3 domains	Server

As you can see I own over 160 websites, and this is with just **one hosting company**. I also own other websites via other online hosting companies.

Some of these websites make hundreds of dollars per week while some make only a few cents a day. However, **every single one of my websites makes me money** and if half of my websites suddenly stopped making me money tomorrow my business would still survive, but of course I don't just sit back and watch the money roll in, I keep creating new websites and I keep building my business.

Build Your Own Profitable Autopilot Online Empire Each and Every Month:
www.FreeMonthlyWebsites2.com

However, it wasn't always like this. In the beginning most of my websites took a long time to set up plus there was a huge learning curve while building my first website, and when I look back it was terrible and ultimately failed to generate any kind of income because of this. This was because I was new to this game and although I thought I'd created a half decent looking website it was hideous.

Then I met Dave Nicholson and things quickly changed, nothing seemed too technical for Dave and he helped me build my very first website. This was way back in 1999 and since then Dave has always been there when I needed help. Fast forward 10 years and the result is we both have built a ton of successful websites and we now live the life we never thought possible.

So why am I telling you all of this? Well before I tell you, let me ask you another question first.

If you created a site that only earned you \$1 a day would you consider it to be a successful site?

Now I know most people will say no, and if you did your mindset is all wrong. You see if you could build a site that earned you \$1 per day all you would need to do is repeat the process till you had thousands of sites online all making \$1 a day.

Remember when I said earlier some of my websites only make a few cents a day? Well combine all of my sites that make a few cents here and there and you have a full time income. And this is what so many people fail to grasp. They spend months working on a single site that ultimately doesn't look very nice and when it fails they give up. When

what they really should have been doing was concentrating on building as many sites as possible until they found a formula what worked, then simply duplicated that formula.

But of course finding the correct formula is also hard, do you build a site that relies on Google AdSense, eBay, ClickBank, Amazon or something completely different? Well the truth is you build a ton of sites that use all of the above in different areas. Some of my websites generate an AdSense income while some generate an income from eBay and some simply from promoting ClickBank products. It all depends on the site I build and the niche I choose, but every single one of them in one way or another generates an income and most of this income is generated on 100% autopilot.

So come on then John, why are you telling me this? Well before I do let me ask you one final question.

Imagine if you could be supplied with a website **completely free** that takes minutes to set up that could go on to generate you an income for years to come? Then imagine if you were given more websites **completely free** on a regular basis. Would you be interested?

It's all very well you telling me this John but I haven't got a clue how to build a successful website.

Allow me to enlighten you (at last I hear you say)

Both Dave and I know how hard it is to build a successful website, we know most people don't have a clue about SEO, HTML, FTP, databases, creating opt-in forms, promoting affiliate products, generating RSS Feeds and a whole lot more.

This is why we have put our 10 years experience into building a product that can help anyone (yes anyone) build a successful website that can incorporate all of the above, this product is Called 'Free Monthly Websites'. Now before you think this is an old product as it was originally launched back in 2006 it's not as it's now been 100% revamped and is bigger and better than ever.

We don't care if you have no websites online and know nothing about building a website, as we will show you how. In fact you really can build a 100% unique site in under an hour that will generate an income for years to come.

Let me show you how it works:

- 1, First of all you upload your website.
- 2, Then you add your settings to make your site personal.

That's it, you're done! You now have a website online that has the potential to earn you an income for life.

Hold on John, I have seen sites like this before, they all look the same.

Let me assure you that you haven't seen anything like Free Monthly Websites before. There has never been a website creator that was so easy to manage that could produce a 100% original site. Take a look at the screen shots below and you'll see exactly what I mean:

Build Your Own Profitable Autopilot Online Empire Each and Every Month:

You have to admit those sites look pretty great, but what about duplicate content, do all these sites have the same content?

The content is totally different on each site, in fact this is where Free Monthly Websites shines, as it allows you to edit as much of the content as you wish from your built in admin panel. In fact we encourage you to edit the content, as Google loves original fresh content. So as you can see there has never been anything quite like Free Monthly Websites.

Plus each and every month we supply a brand new content rich niche website that will take just minutes to set up.

Not only can you make your websites a success and earn advertising revenue, if you are just starting out with your first business website online you're in a perfect position to manage your own sites easily, save money and learn how to build a profitable online business.

It's All about List Building

I'm sure you have heard many online marketers say 'the money is in the list'.

I really can't stress how true that is. Having a mailing list means you can create money on demand and every day you put this off is another day of lost opportunity. However, I know that for a lot of people creating a mailing list seems like an impossible task. Well with Free Monthly Websites it's a breeze.

All you need to do is fill in 2 fields and you instantly have an opt-in form on your website. **Then you can begin building a list from every single site you create just like I have:**

Listname	Today	Yesterday	Subscribed

As you can see from the image above I have many different lists created from many different websites. Some lists have a few hundred subscribers and some have many thousands, but they all generate me **subscribers on autopilot**.

Build Your Own Profitable Autopilot Online Empire Each and Every Month:
www.FreeMonthlyWebsites2.com

With Free Monthly Websites we will teach you how you can build a subscriber list from **every single one of your websites**, we will also show you how to maximize your profits from the lists you create.

Imagine having tons of sites all generating you just a few subscribers a day. What could that do for your online business?

I think we have said all that can be said about Free Monthly Websites without showing you more. So please visit www.FreeMonthlyWebsites2.com where we will give you a comprehensive tour, show you how we have made Free Monthly Websites bigger and better than ever, show you some live example sites and show you exactly how everything works. Oh, and just in case you think there's a catch as we are giving these sites away free you will also learn how this is win win for everyone.

So join us by visiting www.FreeMonthlyWebsites2.com right now.

Here's to your success with Free Monthly Websites.

John Thornhill & Dave Nicholson.
